

## Concrete Slat

Deba Brothers® is a professional China Concrete Slat manufacturers and suppliers. The cement slat is easy for manure cleaning, which can leaking the pig manure in manure discharge tunnel and reduce the bacteria and odor in the pig barn, reduce the labor and cleaning water. The cost of cement leakage slat is low, and reasonable design, the service lifespan is long. It is the choice of many pig farms and cost effective solution.

## Product Description

Deba Brothers® is a professional leader China Concrete Slat manufacturers with high quality and reasonable price. The concrete floor provided by Deba Brothers® is thick, which is very suitable for heavy pigs. The concrete slat is generally used for the gestation stall and finisher stall. The sows in these two periods have a large weight, and the concrete slat has a large bearing capacity, which is convenient for cleaning.

### Concrete Slat Specifications

Material	concrete
Size	1.05*0.6m/1.1*0.6m/1.5*0.6m/2.0.6m/2.2*0.6m 2.3*0.6m/2.4*0.6m/2.5*0.6m/3*0.6m
Other	customized

### Concrete Slat Advantage

- 1.long lifespan, wear resistance, compression resistance.
- 2.The bearing capacity can reach 400 kg.
- 3.The cement leakage slat can adjust the temperature and humidity of the pig farm.
- 4.Easy leaked to the discharge tunnel.
- 5.High quality and low price, corrosion resistance, high temperature resistance, water saving and labor saving.
- 6.The product has good flame insulation and static resistance, and good heat dissipation and good ventilation.
